

SHIVANI TEKUMUDI

FRONTEND ENGINEER · REACT.JS · TYPESCRIPT

Visakhapatnam, India · shivani9668@gmail.com · +91 9652477918 · [GitHub](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 4 years of experience delivering scalable, production-grade React applications for SaaS platforms. Expert in TypeScript, state management (Redux Toolkit, React Query, Zustand), and performance optimization. Proven track record of improving page load times by ~30%, driving API design decisions, and raising code quality standards through structured reviews and reusable component architecture. Based in Visakhapatnam with immediate availability.

TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3	Tailwind CSS · Responsive Design · Reusable Components, Material UI
State Management	Redux Toolkit · React Query · Zustand · Context API	Caching · Error Handling · Async State Management
Testing & Build	Jest · React Testing Library · Webpack · Vite · Babel	Code Splitting · Lazy Loading · Memoization
Tools & Workflow	Git · GitHub Actions · Vercel · Figma · REST APIs · CI/CD · Agile/Scrum	

PROFESSIONAL EXPERIENCE

UI Developer | Myplotpic Private Limited | Mar 2024 – Present

- Developed and maintained a data-intensive SaaS dashboard handling approval workflows, filtering systems, and role-based actions
- Designed scalable, reusable component architecture that significantly improved cross-module maintainability
- Integrated REST APIs using React Query — implementing caching, optimistic updates, and async error handling
- Collaborated with backend engineers to define API contracts and reduce redundant network calls by ~40%
- Conducted code reviews, enforcing TypeScript standards, accessible markup, and performance best practices
- Participated actively in sprint planning, grooming, and retrospectives in an Agile/Scrum environment

Key Achievements:

- Improved page load performance by ~30% using code splitting, lazy loading, and memoization

Software Engineer | HR Geckos | Nov 2021 – Jan 2024

- Led frontend migration from a legacy UI to a modern React + TypeScript architecture
- Built dynamic dashboards, multi-step forms, and admin workflows using API-driven component design
- Implemented structured state management using Redux Toolkit and React Query across multiple modules
- Ensured cross-browser compatibility and pixel-perfect responsive UI for desktop and mobile
- Translated business requirements into maintainable technical solutions with documented component libraries

Key Achievement:

- Improved team velocity through reusable component systems — new features delivered 25–30% faster post-migration

NOTABLE PROJECT

Admin Workflow System — Personal / Deployed on Vercel with CI/CD via GitHub Actions

- Built a real-world admin system with approval workflows, audit logs, and granular role-based access control
- Managed application state using Zustand and React Query; implemented activity tracking for user actions
- Applied performance optimizations (memoization, virtualized lists) to handle complex UI at scale
- Explored AI-driven UI interactions with API-based chat-like workflows and scalable cloud-ready patterns

EDUCATION

Bachelor of Technology (CSE)

Pydah College of Engineering and Technology

2015–2019
